CONCENTRATION ADVANTAGE

Hardwood (50% polar powder) has higher impact strength than other softwood fibers, such as bamboo powder, rice husk powder, etc.

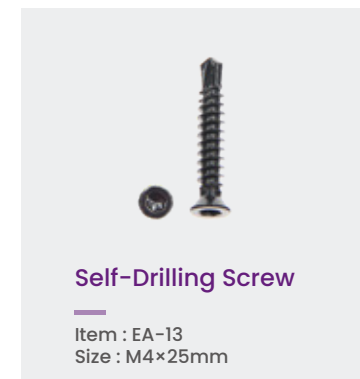

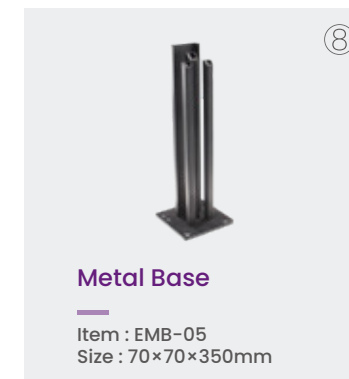

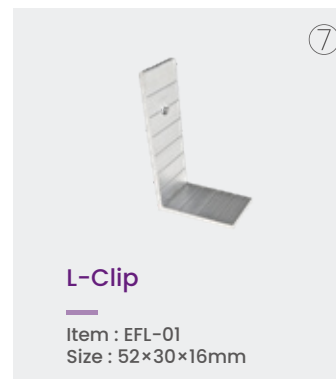

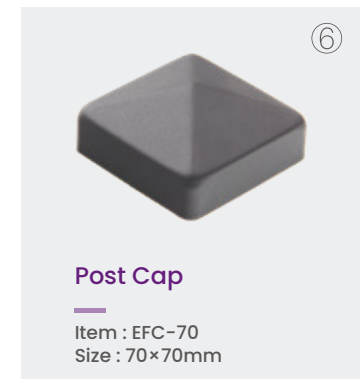

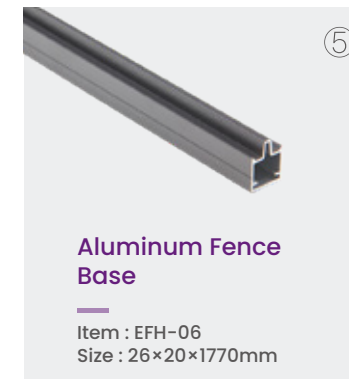

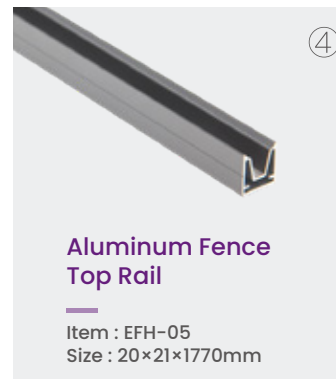

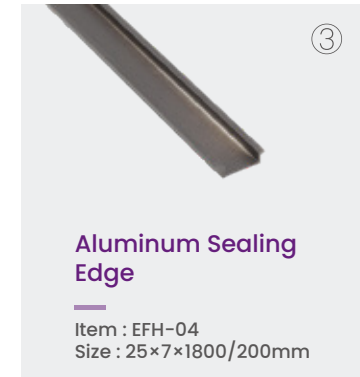

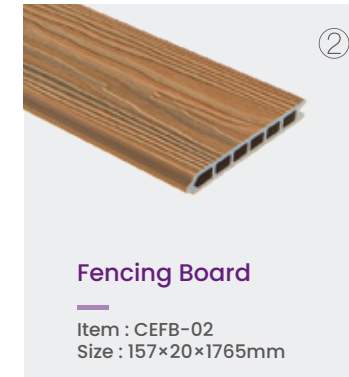

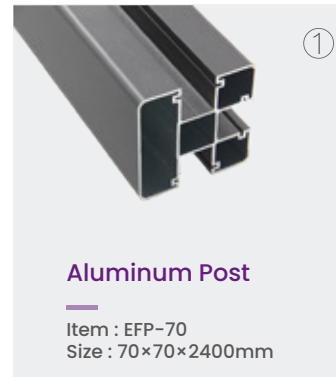

The HDPE (small barrel materials and bottle cap materials) used by EVODEK®, which has better tensile strength, surface hardness and rigidity. The HDPE consumption of 38% is much higher than that of other similar manufacturers in the market.

EVODEK® formula additives (12%) including Dupont coupling agent which have perform better in terms of water resistance, UV resistance and anti-aging.

ACCESSORIES

However, due to variations in display devices and printing methods, there might be slight differences in the color representation of the product color chart you're viewing. For assurance, we suggest requesting actual samples from our sales representatives to confirm color accuracy.

PROJECT SHOW

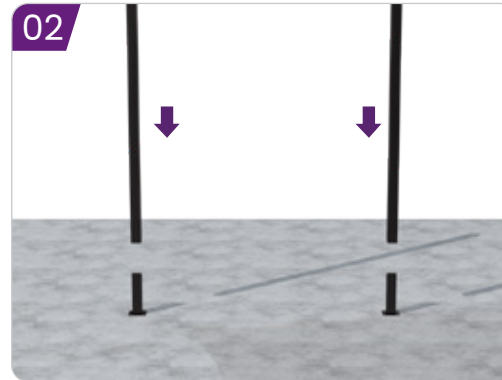

APPLICATION

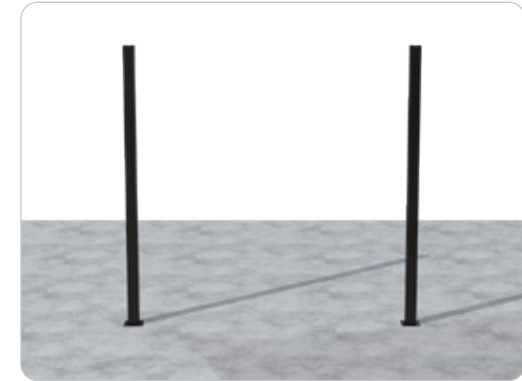

◆ Post With Steel Base Installations

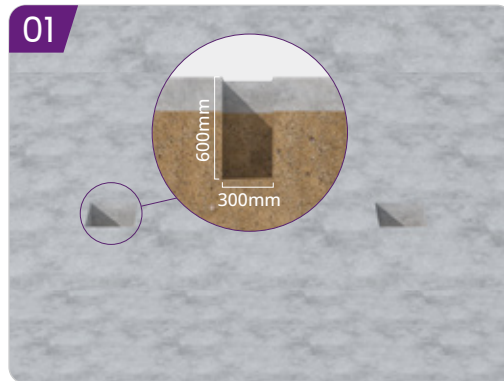

Determine the position of the fence posts, anchor the steel bases to the ground with SS expansion bolts.
Note: Keep the fence posts in a straight line.

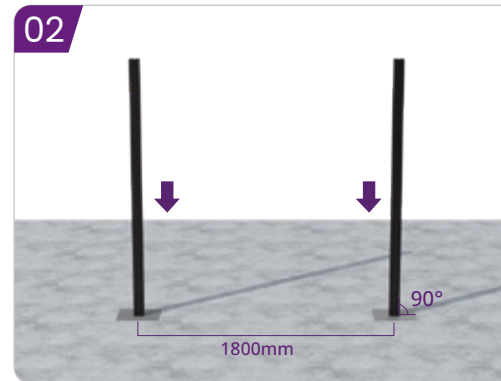

Slide posts over the steel bases.

◆ Post Pre-buried Steel Tube Installations

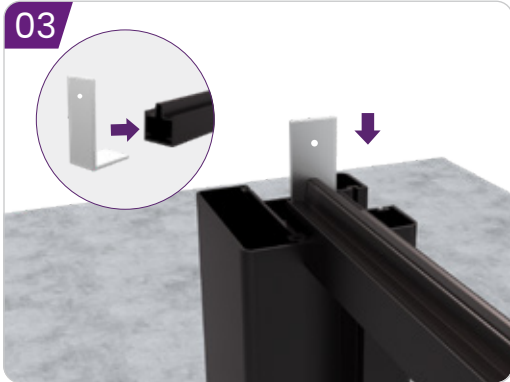

Dig a 300mm diameters' hole in the ground with a depth of min 600 mm (or follow local practice), and make sure they're properly spaced. The spacing between posts on-center should be 1.8 meters.

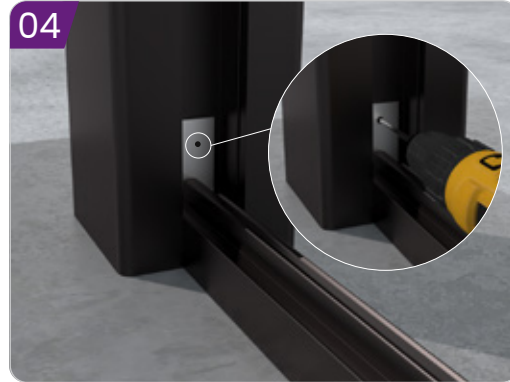

Place posts into the holes. Pour in concrete and wait for it to set. Make sure the posts are plumb and in a straight line.

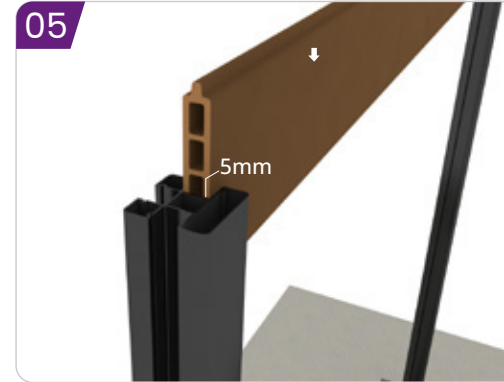

INSTALLATION INSTRUCTIONS

03 Attach L-clips to each end of the aluminum fence bottom rail and push them down to the bottom.

04 Fix L-clips to the post with self-drilling screws.

05 Slide the fence boards into the post slots in the correct direction, ensuring they are straight. Ensure a 5mm gap between the fence boards and posts.

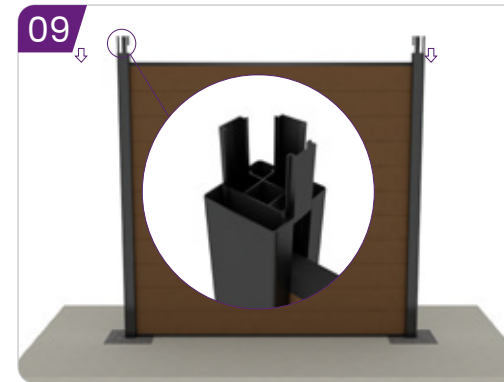

06 Slide the next fence board onto the post, ensuring it is straight. Continue installing fence boards.

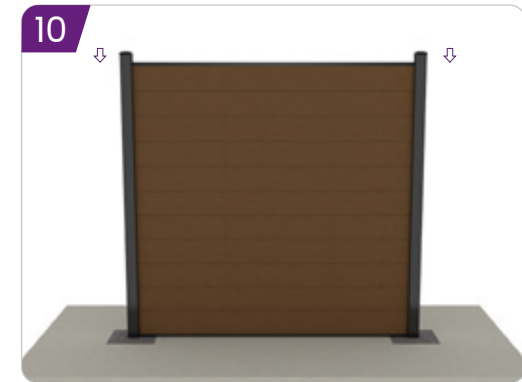

07 Attach L-clips to each end of the top fence board and put them into position.

08 Fix L-clips to the post with self-drilling screws.

09 Slide in sealing edges.

10 Put on post caps. Installation finished.
